

Craft personalized messages for each card carrier

Communicate directly with customers to strengthen loyalty

Use customized promotions to increase card usage and drive revenue

Delivers up to 55 pages per minute at 600 dpi (resolution dependent on quality of original input image)

High-yield black toner cartridge for longer system uptime

Color touch screen display for improved operator use

High-capacity paper tray provides extended run times, when configured for MXD611 applications only

MXD210 and MXD111 print speed is up to 17 pages per minute or 1,020 FPH due to HP default settings that prevent the fuser unit from overheating

When connected to an MXD611 and printing legal size 8.5" x 14" documents, print speed is up to 17 pages per minute (1,020 FPH) Mid-Volume Production Device

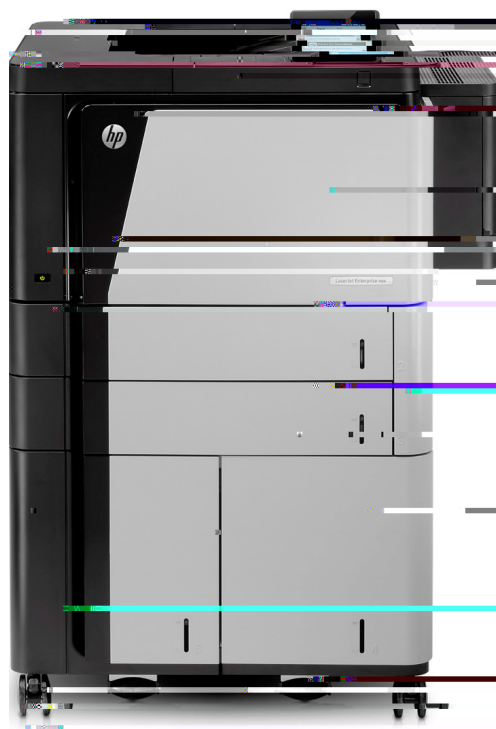

Two serial printer license keys (PLKs) are included to enable operation and recommended product life messages.

The economically priced HP M806 inline printer integrates seamlessly with Datacard DX3100, MXD611, MXD210, and MXD111 Card Deliver Systems. It is ideal for issuers running black and white, one-to-one marketing communications.

High-capacity input tray provides additional capacity, allowing users to spend more time focusing on business and less time reloading paper

Intuitive 4.3" (10.9 cm) color touch screen control panel
