

LITHUANIA MODERNIZES THE PRODUCTION OF PASSPORTS AND ID CARDS

CHALLENGE: Lithuania's old ID, e-passports, and e-ID cards were outdated and inefficient. The government wanted to modernize the production process and reduce costs.

SOLUTION: A new production process was implemented, featuring a new ID card design and a new e-ID card design. The new ID card design was more secure and efficient, and the new e-ID card design was more user-friendly and secure.

RESULTS: The new production process resulted in a 50% reduction in production costs and a 20% increase in production efficiency. The new ID card design was more secure and efficient, and the new e-ID card design was more user-friendly and secure.

Budget-friendly pricing

Lithuania's old ID, e-passports, and e-ID cards were outdated and inefficient. The government wanted to modernize the production process and reduce costs. The new production process was budget-friendly, resulting in a 50% reduction in production costs and a 20% increase in production efficiency.
