

Letter from our President and Chief Executive Officer, Todd Wilkinson

To our customers, colleagues, partners, and communities:

As the leading provider of trusted identities, payments, and data protection, Entrust has been committed to protecting identities and data for more than 50 years. Our goal is to carry this commitment from our innovative products and services to the way we run our business, advance our company culture, and support our communities – both in our industries and the places where we live and work.

That's why the Entrust Environmental Social Governance (ESG) program arises from the values expressed in our tagline **SECURING A WORLD IN MOTION** – functional involvement.

Our ESG focus areas include:

- x Access and Affordability – We are actively working to ensure that our products and services, including our websites, meet internationally-recognized standards for accessibility.
 - x Business Ethics – Our Code of Ethics, which all colleagues annually attest to, is available [here](#).
-
- x Community – Our Entrust Cares initiative empowers our colleagues to positively impact our communities around the world through local, on the ground charitable efforts.
