

ENTRUST

ComSignTrust and Entrust enable scalable, secure digital signatures

Scaleable, secure digital signatures for any organization

HIGHLIGHTS

- Improves efficiency of organizational data workflow
- Save time, cost, and resources of manual tasks
- Eliminate future costs associated with document production, handling, storage and disposal
- Experience immediate savings by going paperless
- Free-up personnel to enable increase productivity
- Get secure, cost-effective managed digital storage

The problem: a typical large organization produces and signs over 1 million documents per month

Paper documents are often mailed and almost all are physically stored and archived for future usage. The cost of production, delivery, handling, and storage can be quite substantial. Moreover, it places an unnecessary burden on the consumer - the need to open, dispose, or store the documents.

The challenge: achieving a secure and reduced paperless work environment

As organizations pursue paperless work environments to increase efficiencies, save resources, and reduce costs, security is top of mind. Digital mechanisms provide the tools needed to embed signatures and to record and validate transactions for logging and auditing all signing operations. Doing this in a manner that scales and provides legal evidence is essential for a trusted system.

ComSignTrust and Entrust enable scalable, secure digital signatures

Entrust HSM

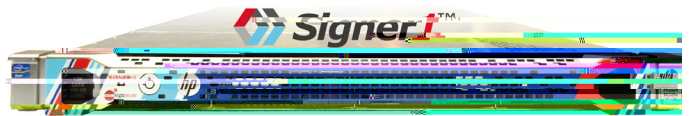

Entrust nShield HSMs are among the highest-performing, most secure and easy-to-integrate HSM solutions available, facilitating regulatory compliance and delivering the highest levels of data and application security for enterprise, financial and government organizations.

Our unique Security World key management architecture provides strong, granular controls over access and usage of keys.

ComSignTrust

ComSignTrust assists organizations to get control over their digital transactions and e-activities by ensuring signer authentication and authorization. By doing so, organizations are able to prevent fraud and business disruption and ensure a highly secure, globally compliant, cost-effective, and automatic digital workflow. ComSignTrust offers digital signature solutions for desktop, enterprise, portable tablets and handset, as well as cloud, web, point of sale and mobile enabled deployments that integrate with applications such as SAP Business One, MS-SharePoint, Salesforce.com, ERP, CRM and BPM solutions. A professional development team is available to address special needs.
